

## IRIS Gives You Options!

IRIS is the free statewide immunization record tracking system.

Benefits of IRIS include:

- Free training and technical support
- Quick access to records
- Access to current immunization resources such as the VFC order form, Pink book, ACIP guidelines and the annual School Report
- Fewer calls to other facilities to track down immunization records
- All ages can be enrolled
- Automatically forecasts immunizations according to the ACIP schedule
- Vaccine Accountability- including automatically generated reports
- Creates reminders
- Ability to quickly recall patients if there is a shortage or compromised vaccine
- Creates a file for CASA reports. You don't have to pull files for you QAR visits!
- Assists schools and day cares in your community
- Multiple reports to manage your data

There are at least 3 ways to connect to IRIS- which one works best for your office?

1. If you have an existing patient management system in your office containing patient demographics and procedure codes...

We can give the vendor of your system the specifications to create an export of immunization directly to IRIS to eliminate the need for duplicate data entry. (Note that your vendor may charge a fee for this capability.) This is a practical way to connect to IRIS, since it helps you get full value out of your present system and adds important connectivity to the state central immunization database.

- a. Using an Internet Service Provider and Browser, you can access the central database through IRIS-Web...

This option allows for quick access to immunization data. It requires additional data entry if you do not have an export, but may be the most feasible for your practice. It is a secure web-site requiring each user to have a user name and password assigned and maintained by the Idaho Immunization Program.

- b. You can FAX or mail your data to your local health district office for data entry, and then access the data through an Internet connection.

Although inexpensive, this option provides least access to your patient information. Your local health district may do the data entry, generates reports about your patient information, and forward them to you. The Internet connection allows you to access immunization records on the patients in your clinic.

Call your local IRIS Contact at the health district office for more information about enrolling in IRIS. The sooner you call, the quicker you can take advantage of this valuable data resource!

## Enrollment Form

Fax this completed form to your local IRIS Contact

Date Preliminary Assessment Completed: \_\_\_\_\_

**DIRECTIONS:** Please fill out only the top portion of this Enrollment Form to register for access to IRIS.

Facility Name: \_\_\_\_\_

VFC Program Pin # \_\_\_\_\_ (Health Care Facilities Only)

Site Address: \_\_\_\_\_

County, City & Zip Code: \_\_\_\_\_

Mailing Address (if different than above): \_\_\_\_\_

Contact Name: \_\_\_\_\_ Contact Title: \_\_\_\_\_

Phone # (w/area code): (\_\_\_\_)-\_\_\_\_-\_\_\_\_
